6.7   Auto-Answering

User may enable auto-answering feature on the device and any incoming call will be automatically answered (not including call waiting). The auto-answering can be enabled on line basis.

To quickly enable or disable the auto-answering on both lines,
When the device is in the default standby mode,

● Press soft-button ⟫ [More] till you find the ↓↓ [Auto-answering] button.
● Press ↓↓ [Auto-answering] button to enable auto-answering on both line and icon ↓↓ will be displayed on the screen.
● Press ↓↓ [Auto-answering] button again to disable auto-answering on both line and icon ↓↓ will be disapeared.
● The default auto-answering delay is 5 seconds.

Figure 66 - Auto-answering Enabled on Both Lines

If user wishes to enable or disable auto-answering on a specific line or change the auto-answering delay time, user could change the auto-answering configuration in line configurations.

● Long-pressed L1 or L2 line key to open the line configuration screen.
NOTICE! If user has set PIN code, user must enter correct PIN code first before editing line configurations.
● Press up navigator key once, the Auto-answering setting is the last setting in line configuration.
● Press left/right navigator key or the soft-menu button < [Left] / > [Right] to select the auto-answering option. When done, press ✓ [OK] button to save the changes.
● User will see icon ↓↓ 'Auto-answering on Line1' or ↓↓ 'Auto-answering on Line2' against the enabled line.
